

2017 IEEE/SICE International Symposium on System Integration (SII2017)
Special Session on
“Technology Design on Human Factors”

organized by

Principal Organizer: Dr. Sho Yokota (s-yokota@toyo.jp), Chair of TC-HF,
Toyo University, Japan.

Organizer 1 : Yihsin Ho (hoyihsin@tmu.ac.jp)

Tokyo Metropolitan University, Japan.

Organizer 2: Satoshi Suzuki (ssuzuki@fr.dendai.ac.jp)

Tokyo Denki University, Japan

Organizer 3: Hiroshi Hashimoto (hashimoto@aiit.ac.jp)

Advanced Institute of Industrial Technology, Japan

Sponsoring:

IEEE IES Technical Committee on Human Factors (TC-HF), Sho Yokota, Chair

Call for Papers

Theme: Human Factors is the key concept to develop an aspect of production systems, and then it is expanding to human support systems. It basically depends on various sensing technologies, and not only the physical but also psychology aspects should be considered. In particular, Robotics and Intelligent system are core technologies for developing the system or considering human factors. Therefore, the organizers propose a Special Session to discuss some case studies based on human factors with focusing on Robotics and Intelligence.

Topics of interest include, but are not limited to:

Human-System Interaction, Human Support System, Sensing and Recognition,
Ambient intelligence, Robotics, Mechatronics and Control

Submissions Procedure: All the instructions for paper submission are included in the conference website <http://www.sii2017.org>. A good quality paper may be considered for publication in IEEE Transactions on Industrial Informatics subjects to further rounds of review

Deadlines:

Reception of full paper:	June 30, 2017
Paper acceptance notification:	September 20, 2017
Camera ready paper reception:	October 20, 2017
