

2017 IEEE/SICE International Symposium on System Integration (SII2017)

Special Session on “Community service robot”

organized by

Principal Organizer: Dr.Nobuto Matsuhira (matsuhir@shibaura-it.ac.jp)
Shibaura Institute of Technology

Organizer 1: Toru Yamaguchi (yamachan@tmu.ac.jp)
Tokyo Metropolitan University

Organizer 2: Masahiko Narita (narita-masahiko@aiit.ac.jp)
Advanced Institute of Industrial Technology

Call for Papers

Theme: Japan and some other countries are getting an elderly society. A robot is expected, as a multimedia active device in the information network, to cope with such a social problem. However, there are few robot systems and markets still now. We established a robot utilize research group in Tokyo, Japan. The robot network using several types of robots has been verified to play an important role connecting and activating with people and region. So, various applications are to be demonstrated and discussed to implement robots into the society. We welcome new concepts, services, and verification tests using robots.

Topics of interest include, but are not limited to:

- Service robot
- Robot network
- Verification test
- Robot service
- Robot middleware
-

Submissions Procedure: All the instructions for paper submission are included in the conference website <http://www.sii2017.org> . A good quality paper may be considered for publication in IEEE Transactions on Industrial Informatics subjects to further rounds of review

Deadlines:

Reception of full paper:	June 30, 2017
Paper acceptance notification:	September 20, 2017
Camera ready paper reception:	October 20, 2017
